Since graduating from University, I've been working on improving my current skills and learning new ones through freelance work, personal projects and tutorials. I have also been working in retail and promotions to make sure my customer service skills and other personal attributes are constantly being used and improved upon.

Currently working on:

- FX in Houdini
- Stereoscopic 360 Content
- Basic Scripting

I consider myself to be more technically minded than artistic, and I understand a career within VFX requires hard work and determination. I want to work my way up in the industry, with aspirations to become an FX Technical Director.

Software Skills:

ATTRIBUTES

- Motivated
- Reliable
- Cooperative
- Independent
- Productive
- Enthusiastic
- Organized
- Versatile
- Confident
- Resourceful

In my free time I like to relax by either reading a book from my extensive library or watching TV dramas and films that are mentally stimulating.
